CAREER OBJECTIVE

To be a good Web Developer to enhance my skill set and capability to develop a useful web-based project both front and backend. As a person who like to collaborative with different people and always choose as a leader in our school, my socialization skill might help the company productive and I see that as good for healthy working environment. With years of coding experience, I was looking for competent company like Accenture that will expand my learning and make a great foundation to my web skill.
